ABOUT AIUB LIFELINE

Background & Problem Context

For most students, university life comes with a lot of pressure such as classes, exams, future planning, and everyday responsibilities all at once. Students are required to manage academic responsibilities, navigate course materials, give examinations, maintain social relationships, and plan for their future all while dealing with personal and real-life challenges. As one of the leading private universities in Bangladesh, AIUB hosts a diverse and dynamic student body that frequently experiences these pressures.

In this context, students face many problems that are not academic issues. These factors include consideration that students are not able to locate on campus lost belongings, they cannot easily find consistent lecture/handwritten notes, they are unaware of the faculty's consulting hours, and there is no go-to space for academic related questions and accessibility of faculty provided materials. Today, students are using informal channels like Facebook groups, WhatsApp chats and word of mouth to serve their needs. They generally work and, typically, lack responsible moderation, and they unaccountably fail to deliver uniform access or good information to all students. The problem exists as there is no unified, organized platform exclusively centered for the AIUB students. It can cause additional stress, miscommunication, and missed opportunities for academic and other forms of personal support. That's why we think it's time for a clean digital solution that aggregates the core student support services into a user-friendly system.

Key Features

1. **Lost and Found:** Students will be able to report and search for missing personal belongings through a secure and centralised platform. The platform will have options to upload images and provide detail time and place of the item so that it would be easier to locate the missing belonging.
2. **Sharing Lecture and Handwritten Notes:** Through this platform the students will be able to upload and search for handwritten notes as well as lecture notes. Students will be able to search the notes by sorting it by course code, instructor, course name and department.
3. **Authorised Material Approved by Faculty:** Authorised scholarly material such as class notes, tutorial sheets, question papers, and practice sets shall be provided by the faculty to the students. There will be fewer unauthorised uses of sources and higher content accuracy.
4. **Faculty TSF Section:** There will be a designated section showing the available consulting times of every one of the faculty members. This will make it easy for students to schedule appointments, clear their questions, or receive study help efficiently.
5. **Q&A Platform:** There will be an academically moderated discussion forum where students will be able to post academic questions, receive answers from peers or instructors, and up vote useful responses. Questions will be label by subject, course, or topic for easier discovery and searching.

Importance of the Problem

Because of the following issues, students waste a lot of valuable time searching for important resources and a lot of times end up with wrong and outdated materials. Students also find it difficult to navigate their lost belonging from home. This platform will solve a lot of problems which in turn will benefit the stakeholders of the university.

AIUB Lifeline Objective

In this technology driven age, not having a single modern platform at a leading private university such as AIUB is conspicuous. Plugging this gap is an opportunity to establish a new and modern platform that can enhance academic achievement along with student life in general.

By introducing this platform the university will truly transform into a modern university justifying the leading university of Bangladesh tag and going on to achieve more great achievements in the future.

Our goal is to build one easy-to-use app that brings together everything students and teachers need in one place by:

- Enhancing academic collaboration.
- Reducing communication gaps.
- Seamlessly access essential latest materials and schedules.
